

MONTREAL™

The decoflame® Montreal™ is a unique made to measure built-in bioethanol fireplace designed without a frame/fascia for a sleek, minimalist look. It is available in various layouts: open to the front only – open to the front and back – open to the front and back and one side – open to the front and both sides. Optional glass shields complete the beautifully crafted quality feel of this timeless fireplace model.

The Montreal™ is available with either one or several manual decoflame® burners on which the flame intensity is steplessly adjustable or with the patented decoflame® e-Ribbon Fire™ featuring CEVB Technology.
