

Built-in FLEX BAY FIREPLACES

Model: FLEX104BY.BX2

Clean Burning

Fueled by clean burning
e-NRG bioethanol

Single Room Application

Bay fireplaces feature three open
sides - view the flame from the front
and both sides.

Global Compliance

These models comply with
existing standards in the USA,
Europe, UK and Australia. UL
Listed, EN 16647 BSI Certified
and ACCC Safety Mandate
compliant.

Toughened Safety Screen

Your Flex Fireplace features
toughened glass to stabilise
the flame in windy conditions
and provide an additional layer
of safety and comfort. The
Integrated windscreen sits flush
behind the frame.

Decorative Side Box

When a decorative box is
added, the panel between the
standard fire and the decorative
box is glass.

Luxurious Finish

Available in a timeless black finish, Flex
Fireplaces come with stainless steel
burners and black glass charcoal.

Decorative Steel Log Sets

EcoSmart Fire offers non-combustible logs as an
optional, eye-catching accessory for models with the
decorative side box. Made from stainless steel with a
patina finish, they are available in different finishes.

**Decorative logs must NOT be placed directly over an
open flame. They are designed to sit near heat but not
over flames.*

Built to Last a Lifetime

Zinc sealed steel construction powder
coated with super hi-temp black paint
prevents rusting so all fireplaces can
be used both indoors or outdoors.

Zero Clearance

Self-contained, zero clearance construction allows your Flex
fireplace to be framed into wood or metal studs, providing
installation freedom and flexibility for builders, architects,
interior designers, landscapers and homeowners.

OPTIONAL ACCESSORIES

w

Flex Bay Fireplace indicative install

GUIDE ONLY - must read the instructions included with the model

1. Construct a main wall framework. The base of the frame can be a solid bench/platform, which will assist in leveling up the appliance when in position.

2. Slide the appliance inside the framing cavity (the base of the appliance can sit directly on top of the 2 x 4 framing material). The appliance is shipped with red stability bracket(s) installed on the open side(s) to keep the appliance square while in transport and during installation. Keep the bracket(s) on while framing up the setting to assist in minimising movement of the appliance.

3. Ensure that the left and right side edges of the appliance are flush to the frame-work studs.

4. Secure the appliance to the framework with screws using the existing mounting holes on the appliance flanges. Make sure that the appliance is level before securing it in place.

5. Remove the red stability brackets.

6. Complete the construction by finishing the wall paneling around the appliance. (See section on **FINISHING INSTRUCTIONS** and ensure that you fully understand where non combustible materials must be used.)

7. Place the burner into position.

8. Remove the dust protective tape that covers the windscreen mounting slots.

9. If your appliance includes a decorative box on the left / right or both, insert the internal glass panel by feeding the glass upwards into the slot then pushing down into the positioned clips.

**Decorative logs must NOT be placed directly over an open flame. They are designed to sit near heat but not over flames.*

10. Insert the full height glass panel into one of the open end side by inserting the glass into the opening at the top of the appliance, and lowering it into the slots in the base until it bottoms out into place. Repeat the same for the other side of the appliance.

11. Install the windscreen by inserting the two ends into appropriate slots in the appliance. Use a small amount of pressure to push the windscreen in place until it bottoms out into the hidden glass clips.

12. Spread the black glass charcoal evenly around the appliance tray.
