### PACK DETAILS | SIZE | AREA COVERED

0.5-1.0Lbs (6 cups) / pack  
One pack can cover 18/24" Gas Log Set base or a typical 36" DV Fireplace base.

### DESIGN TIPS

Flakes and Splinters are designed to sit randomly on an ember or ash bed as remnants and pieces of logs.

### WARNING:

Always follow Manufacturer's Instructions

## FLAKES, CHIPS & EMBERS

Kindling debris is a natural thing to see under a fire grate and forward onto a fireplace floor. Burnt Orange Splinters, Ashen Embers on Vermiculite simulate such a scenario. There are so many ways to create this picture with the many types of EAF Media here.

**FLAKES AND CHIPS** along with Splinters is a collection of interesting pieces, all with individual or combined purpose. The Slate chips for instance can completely cover the fireplace floor as an alternative to embers, vermiculite or volcanic rock morsels. Splinters are more versatile in their use in the storyline of the fire. They test your imagination!

**THE DIVERSE EAF EMBER COLLECTION** offers exciting shapes, styles and colors from Large Coals to split kindling Splinters. They can be used in place of Glowing Wool or in conjunction with it. The brighter colors of Devil Red, Ashen and Snow White can brighten a floor and showcase a fireplace beautifully. All EAF embers glow in seconds when placed in direct contact with the heat of blue flame.

## PRODUCT FEATURES

- Realistic shapes & textures
- Superior glowing characteristics
- Can withstand up to 1650F
- Easy to blend with Vermiculite & Glowing Wool
