

LUXURY EMBER MEDIA

PICTURED: HOT STUFF

The Luxury Ember Media is a collection of six predesigned, easy to assemble, nicely boxed packets of ember bed media for the realistic decoration across the front of your fireplace floor. All the elements are here in these six designs for reflection and daytime sparkle, lingering hot embers of a fire still live, drama, a former fire gone cold, all the debris from a kindled fire, and just enough kindling left to restart an ever burning forge. Which will you choose?

Pictured here is Hot Stuff. If there are red accents in your room, consider this one!

ABOUT

APPLICATION

To enhance the floor or ember bed in the [Gas log](#) or [Fireplace](#).
