DESIGN TIPS

Spread Glowing Wool loosely over the
burner floor and over the burner ports near
glow logs. Neon Embers can be applied
on top of Glowing Wool for intensified
additional brilliance.

WARNING

DO NOT put Neon Embers on top of Pilots.
Always follow Manufacturer's Instructions.

PRODUCT FEATURES

- Great glowing characteristics
- Richly colored
- Can withstand up to 1650F
- Easy to blend with Embers and Vermiculite

NEON EMBERS & GLOWING WOOL

Who wouldn't want to see electrifying visual pleasure and inspiration in the fireplace from every angle of the room? If you chose realistic logs to go with your dancing flames, you surely want your under-fire to be as appealing! The dependable, traditional twinkling of EAF colored Glowing Wool topped with brilliant EAF Neon Embers creates the compelling, memorable and calming realism you desire. EAF Glowing Wool and Neon Embers help you to "Enhance the Glow!"

NEW WHITE HOT Neon sparkling micro metallics are the finest finishing touch to bring glow logs, glowing wool, vermiculite, or embers to life in your gas fireplace. As with Glowing Wool, they can be placed directly over flame. They are stunning, brilliant and almost invisible when the fire is off.

THIS LONG TIME GLOWING, TWINKLING 'Mystery' of the ember bed is now available in inspiring new ways. Our Glowing Wool is designed in multiple colors to coordinate with colored vermiculite, logs, panels, embers, glass and room accents. It also shows nicely when the fire is off. It can be placed directly over flame.
