

MEDIA FOR SPARKLING SHINE!

TEMPERED GLASS

In the flame or in the daylight, EAF's 1/4-inch and 1/2-inch Crushed Glass creates the magical visions our inner child is drawn to. We want to watch it shine and twinkle, marvel at its color and translucence. Beautiful non-fading colors are here for the asking. Combine any of them with larger pieces and styles of glass, Marble stones, Shells, Urban Rock, Logs or Twigs. It excels wherever it is used and it combines nicely with EAF's colored Vermiculite Collection.

WHO CAN RESIST reflection and twinkles? EAF presents non-fading super colors to capture and enhance the light of flames in the fireplace and fire pit. In daylight the tiny pieces sparkle like jewels. It is a wonderful base for all manner of in-fire objects.

Estimated Fire Glass Requirements

Round Fire Appliance	1" Media Layer
12" Diameter	5 lbs.
20" Diameter	13 lbs.
24" Diameter	20 lbs.
30" Diameter	30 lbs.
